The Fund may invest up to 100% of its net assets in foreign securities. More details are contained in the Fund’s simplified prospectus.

## Risks

The risks of this Fund remain as discussed in the Fund’s most recent simplified prospectus.

## Recent Developments

The U.S. Federal Reserve made two additional quarter-point interest rate cuts during the fourth quarter. The central bank acknowledged that economic activity is strong, and the labour market reasonable. While inflation has come down, it remains higher than their two percent objective. Investors were surprised when the Federal Reserve cautioned about continued aggressive rate cuts into the future. Inflation numbers going forward may be muddled with the President-elect imposing tariffs and deporting unauthorized immigrants. His other election promises of tax cuts and looser regulation may also prove inflationary.

The Bank of Canada reduced its overnight interest rate as economic activity softened due to lower business investment and exports. However, consumer spending and housing activity picked up following lower interest rates. Employment growth has slowed, but wage growth remains elevated. Lower immigration and tariffs from the incoming U.S. administration are expected to weaken our economic growth. The Canadian dollar has depreciated significantly against the U.S. dollar, which may affect consumer sentiment and increase import prices.

The Fund maintains a substantial weight in liquid securities as both credit and interest rate risks remained elevated. The Fund's weight in BB & Below rated securities is 27.6% as spreads on high yield bonds remain tight. The Fund had a net positive exposure of 32.9% to AAA/AA rated securities.

The Fund exited its positions in American Airlines, AMC, Loblaw, Gannett and reduced its positions in Bombardier Inc, Enbridge Inc and Latam Airlines. The top performers for the fund were LRCNs.

The Fund continues to only take on duration when it believes it's being compensated for the incremental interest rate risk or where it can effectively hedge by shorting government securities. At December 31, 2024 the Fund held -7.5% short position in government securities, which are offset by corresponding long corporate and government bonds and a positive cash balance. The Fund's duration was 3.0 years at the end of the year.

There have been no changes to the Manager or Portfolio Manager, or change of control of the Manager, or of the Fund. There have been no actual or planned reorganizations, mergers or similar transactions involving the Fund.

Effective June 30, 2024, Paul Fahey resigned as a member of the Fund's Independent Review Committee ("IRC"). Effective July 1, 2024, Donna Peters-Imbrogno was appointed as a member of the IRC.

## Related Party Transactions

The Manager provides or arranges to provide for the provision of all general management and administrative services required by the Fund in its day-to-day operations, including but not limited to, calculating and reporting the net asset value of the Fund and its series, preparing all offering documents, unitholder recordkeeping and other administrative services. The Manager receives a management fee for these services. The fee is calculated based on a percentage of the net asset value of the Fund as disclosed in the simplified prospectus.

The Fund paid \$355,814 (including HST) in management fees to the Manager for the year ended December 31, 2024 (December 31, 2023 - \$445,268).

The Manager is also entitled to receive a performance fee from Series A and F units of the Fund (the "Performance Fee") under certain conditions as described in the Fund's most recently filed Prospectus. For the year ended December 31, 2024, the Performance Fee accrued and payable by the Fund was \$281,406 (including HST) (December 31, 2023 - \$510,347).

The Portfolio Manager is responsible for all investment advice provided to the Fund including providing investment analysis and recommendations, making investment decisions and arranging for the acquisition and disposition of portfolio investments. Portfolio management fees for the Portfolio Manager's services are paid from the management fee. The Manager will also pay the Portfolio Manager a percentage of any Performance Fee that the Manager receives from the Fund, such percentage to be agreed upon between the Manager and the Portfolio Manager from time to time.

The Manager paid \$310,084 (including HST) to the Portfolio Manager for the year ended December 31, 2024 (December 31, 2023 - \$469,367).

The Manager relied, or may rely on standing instructions from the IRC in respect of securities traded amongst mutual funds, closed end funds, managed accounts or pooled funds managed by the Manager or an affiliate of the Manager. In such cases the Manager is required to comply with the Manager's written policies and procedures presented to the IRC and provide periodic reports to the IRC in accordance with National Instrument 81-107.

### Notes

\* Series A commenced operations on May 11, 2020.

1 The information is derived from the Fund's audited annual financial statements. All per unit figures presented are referenced to net assets determined in accordance to IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB").

2 Net assets and distributions are based on the actual numbers of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

3 Distributions were paid in cash or reinvested in additional units, or both.

4 This information is provided at the end of the period shown.

5 The management expense ratio is based on the total expenses of the period ended and is expressed as an annualized percentage of daily average net asset values during the period. Effective December 31, 2023 the management expense ratio excludes the stock borrow costs which will be reflected in the trading expense ratio.

6 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is calculated based on the lesser of purchases or sales of securities divided by the weighted average market value of portfolio securities, excluding short term securities.

7 The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. Effective December 31, 2023 the stock borrow costs will be reflected in the trading expense ratio.
