Lysander-Canso Credit Opportunities Fund and Lysander-Canso All Country Long/Short Equity Fund are alternative mutual funds. They have the ability to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific strategies that differentiate these funds from other types of mutual funds include: increased use of derivatives for non-hedging purposes; increased ability to sell securities short; and the ability to borrow cash to use for investment purposes. While these strategies will be used in accordance with the funds investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.
