Fund Code: LYS821F

Portfolio Manager: Canso Investment Counsel Ltd.

As of: November 30, 2025

Asset Class: Equity

CIFSC Category: Canadian Focused Equity

Benchmark: S&P/TSX Composite Total Return Index¹

Investment Focus

This Fund invests primarily in equity securities of Canadian corporate issuers.

Why Invest in this Fund?

Established in 1997, Canso Investment Counsel Ltd. is an independent firm focused on bottom-up security selection and fundamental research.

Canso uses its extensive expertise in credit research to identify value in equities that may be out of favour or trading at a discount that potentially offer an attractive upside.

Canso believes in maintaining concentrated portfolios with high conviction in their best ideas.

EQUITY STYLE⁵

Lysander Funds Limited is the investment fund manager of Lysander-Canso Canadian Equity Fund (the “Fund”). This document is not an invitation to invest in the Fund and does not constitute a public offering of sale. Purchases in the Fund can only be made through an investment professional on the terms in the Fund’s offering document by eligible investors. Each purchaser of units in a fund may have statutory or contractual right of action. Please read the prospectus before investing. Commissions, trailing commissions, management fees and expenses all may be associated with investment funds.

The indicated rates of return are historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Investment funds are not guaranteed or insured, their values change frequently and past performance may not be repeated.

²A financial ratio calculated as weighted average of current share price divided by forecasted earning per share of all stocks in the portfolio. A fund’s price to earning ratio can act as a gauge of the fund’s investment strategy in the current market climate, and whether it has a value or a growth orientation. Companies with a surge of popularity tend to have higher price-to-earnings ratios, reflecting a growth orientation, while lower price-to-earnings ratios reflect a value orientation.

³A financial ratio calculated as weighted average of current share price divided by book value per share of all stocks in the portfolio. It compares how the market values a company to the value on the company’s books. For example a company trading at several times its book value tends to indicate a growth stock where investors believe the book value will rise in the future. Typically a company with a low price-to-book ratio means that investors think that the firm’s assets have been too highly valued on its financial statements.

⁴The weighted average market capitalization of a fund’s equity portfolio gives you a measure of the weighted average size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company’s shares

Lysander-Canso Canadian Equity Fund – Series F

outstanding by its price per share.

⁶Distributions are based on the actual number of units outstanding at the relevant time. Distributions are paid in cash or reinvested in additional units of the Fund. If the Fund's series' net income/capital gains is less than the amounts distributed in the year, the distribution will include a return of capital. In these circumstances, if an investor elects to receive their distributions in cash and not reinvest such distributions, it is expected that the value of their investment will decline over time. Distributions are not an indication of performance, rate of return or yield.
