## Recent Developments

During the year, markets defied expectations as trade policy disruptions, idiosyncratic credit events, and delayed U.S. economic data heightened uncertainty. Beneath the headlines, a broader theme of caution persisted, reflected in consumer confidence surveys, subdued corporate hiring intentions, and ongoing concerns surrounding tariffs, immigration, and fiscal policy. Labour markets in both the U.S. and Canada remain fragile, while core inflation continues to exceed central bank targets.

Throughout the year, the Bank of Canada (the “BoC”) reduced the overnight interest rate by 100 bps to 2.25% as trade conflicts weighed on economic activity. Employment growth slowed, influenced by lower immigration levels and the impact of U.S. tariffs on select sectors. Despite these pressures, consumer spending has remained resilient. The Canadian dollar appreciated against the U.S. dollar but remains below historical averages, which may contribute to higher import prices. The BoC has signaled that it expects to remain on hold for an extended period as monetary policy hands off to fiscal policy.

During the year, the Federal Reserve (the “Fed”) cut the upper bound of the Fed Funds Target Rate by 75 bps to 3.75%. The Fed’s stance reflected caution amid mixed economic data, including rising unemployment, even as core inflation remained above target.

The Fund maintains a sizeable position in liquid government securities, reflecting elevated credit and interest-rate risks. Government securities account for 23% of the portfolio, while 48% is invested in securities rated AAA/AA. These higher-quality, liquid holdings position the Fund to take advantage of future opportunities in the credit markets at more favourable valuations.

During the year, the Fund added the following corporate bond issues: Cogeco Communications Inc. 4.743% February 6, 2035; 407 International Inc. 4.45% September 11, 2052; First Nations Finance Authority 4.05% June 1, 2035; Greater Toronto Airports Authority 0% February 2, 2028; MassMutual Global Funding II 4.127% July 15, 2032; Pacific Life Global Funding II 4.195% July 29, 2032; VW Credit Canada Inc. 4.49% November 19, 2029; and WTH Car Rental ULC 3.787% September 20, 2028.

The top contributors to performance over the year were Metropolitan Life Global Funding 1.95% (March 20, 2028), Manulife Financial Corp 3.375% (June 19, 2021), and Honda Canada Finance Inc. 1.646% (February 25, 2028).

Canso’s guiding principle is to take risk only when adequately compensated, applying this discipline to both interest rate and credit exposure. At year end, the Fund’s duration was 7.2 years, modestly above the benchmark duration of 6.9 years.

There have been no changes to the Manager or Portfolio Manager, or change of control of the Manager, or of the Fund. There have been no actual or planned reorganizations, mergers or similar transactions involving the Fund.

Effective June 30, 2025, James McGill ceased to be a member of the Fund’s Independent Review Committee (“IRC”). Effective June 30, 2025, Mary Anne Wiley was appointed as a member of the IRC.

## Related Party Transactions

The Manager receives a management fee for these services. The fee is calculated based on a percentage of the net asset value of the Fund as disclosed in the simplified prospectus.

The Fund paid \$676,706 (including HST) in management fees to the Manager for the year ended December 31, 2025 (December 31, 2024 - \$686,128).

The Portfolio Manager is responsible for all investment advice provided to the Fund including providing investment analysis and recommendations, making investment decisions and arranging for the acquisition and disposition of portfolio investments. Fees for providing these services are included in the management fee. Portfolio management fees for the Portfolio Manager’s services are paid from the management fee.

### Notes

- The information is derived from the Fund's audited annual financial statements. All per unit figures presented are referenced to net assets determined in accordance to IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB").
- Net assets and distributions are based on the actual numbers of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.
- Distributions were paid in cash or reinvested in additional units, or both.
- This information is provided at the end of the period shown.
- The management expense ratio ("MER") is based on the total expenses of the period ended, including the Fund's proportionate share of the MER, if any, of any underlying fund in which the Fund has invested, and is expressed as an annualized percentage of daily average net asset value during the period. Effective January 1, 2025, the Fund paid a management fee of 1.05% (formerly 1.15%) per annum for Series A units and 0.55% (formerly 0.65%) per annum for Series F units.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is calculated based on the lesser of purchases or sales of securities divided by the weighted average market value of portfolio securities, excluding short term securities.
- The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. Where the Fund invests in any underlying fund, the TER includes the Fund's proportionate share of the commissions of any underlying fund in which the Fund invested.

The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Past performance does not necessarily indicate how the series will perform in the future.
